- Monica should her half banana in the black bin because it is for organic waste.
- Everybody should use light bulbs because they don't waste too much energy.
- In summertime, people drop plastic bottles on the beach and the sea with their garbage.

E Read Julia's speech below and answer the questions.

START TODAY FOR A CLEANER WORLD!

Hello! I am Julia. My friends and I are at the seaside today, and we're picking up garbage. People drop litter everywhere. This is harmful to animals and the environment. For example, plastic bags can kill the animals in the sea, and glass pieces in the forest can start a fire. What should we do to stop this? We must use trash bins. Also, we should separate our garbage and classify it for recycling. There are six different types of recycling bins. They are all in different color. Paper bin is blue, and we put paper waste such as books, newspapers and magazines in it. Organic bin is black, and we put our fruit and vegetable waste in it. E-waste bin is red, and we should throw our old computers or TV sets in it. Plastic bin is yellow, and we put our plastic waste in it. Metal bin for metal waste is grey, and glass bin for glass waste is green. Reusing is another thing to do to protect the environment. To reuse things, we can make our own plant pots with old plastic bottles, or we can make shopping bags with our old clothes. Now I have to continue cleaning the shore with my friends. See you next time!

1. What are Julia and her friends doing at the seaside?
.....
.....
2. Why should we use trash bins?
.....
.....
3. How can we reuse things?
.....
.....
4. Which objects can we put in the red bin? Give other examples.
